HISTOPATHOLOGY REPORT

GROSS EXAMINATION:

Accession No. : S2500835A

Specimen labelled as "superficial tissue for mass" comprises of single soft tissue piece measuring 3 × 2 × 1 cm.

MICROSCOPIC EXAMINATION:

Multiple sections examined show fibroadipose tissue and neurovascular bundle. No post-therapy changes or malignant cells identified.

Note: Patient is a known case of Ewing sarcoma post-neoadjuvant chemotherapy (12 cycles) in 2024 – vide clinical history and pathology accession number S2430201.

AGNOSIS:

S2500835A	Thigh biopsy	Biopsy from right thigh mass	• Descriptive, see above

Diagnosis (ICD 11) Chronic Ewing sarcoma, primary site, Right, right upper thigh
ICD 11 Codes:

Surgery Open, Excision, Right

History & Examination

History of Present Illness child was apparently well 1 year back when he developed swelling of right upper thigh which was gradually progressive, not a/w pain/weakness, not a/w any history of trauma, no h/o difficulty in walking. swelling was increasing in size that was causing difficulty for child to wear clothes. No h/o skin changes or any other swelling. No h/o weight loss/ decrease in appetite
No h/o urinary or bowel complaints, no h/o respiratory complaints.
Child was shown in BRD medical college where soft tissue sarcoma was diagnosed clinically and child underwent biopsy that showed small round cell tumour and child was referred to AIIMS for further management. Pt received 12 cycles of (VCD/IE) chemotherapy under med oncology and significant decrease in size was noticed, for which child is now admitted for surgical excision

Past History as per HOPI

Treatment History Received 12 cycles of (VCD/IE) chemotherapy under med oncology (27/8/24 to 18/11/24)

Examination GC fair, child alert active and comfortable on room air
PR- 70/min, RR- 18/min, SPO2 98% on room air
No pallor/ icterus/ cyanosis/ clubbing/ edema/ lymphadenopathy
post chemo alopecia present
CVS- S1 S2 present, no murmurs
RS- b/l air entry present, no added sounds
CNS- higher mental functions intact, no sensory motor disturbances
P/A- soft, non distended, non tender, no organomegaly
L/E- ill defined, non tender, immobile swelling in right upper thigh. No skin changes/ no ulceration.
power in right lower limb 5/5

NCCT CHEST

STUDY PROTOCOL:

SECTIONS OF APPROPRIATE THICKNESS WERE TAKEN AT ADEQUATE INTERVALS IN MULTI DETECTOR CT SCANNER SO AS TO COVER THE REGION FROM ROOT OF NECK TO THE DIAPHRAGMS. POST PROCESSING WAS DONE ON ADVANCE WORK STATION TO OBTAIN CORONAL AND SAGITTAL SECTIONS.

Clinical information: Follow up post-chemotherapy case of Ewing sarcoma right thigh.

FINDINGS:

Pulmonary Parenchyma and Airways: Bilateral lungs reveal normal parenchyma with normal bronchovascular pattern. No nodules with tree in bud configuration, consolidation, cavitation, honeycombing or any bronchiectatic changes seen in the lungs to suggest active lung disease. No peripheral rounded ground glass opacities / consolidation seen in lungs to suggest acute pneumonia. **No solid nodules or mass seen in either lung.**

Mediastinum and Hila: No enlarged lymphnodes in mediastinum, axilla or supraclavicular fossa on either side.

Heart and Pericardium: Cardiac size is normal with no pericardial thickening, calcification or effusion.

Pleural Space: No pleural thickening or effusion in either hemithorax.

Osseous Structures and Chest Wall: No pathologic osseous or soft-tissue process is present.

Bone Windows: Normal. No aggressive osseous abnormalities.

HELP 12 YEARS OLD BOY KARAN'S LIFE AT RISK

We are reaching out to you today with a plea for help 12-year-old boy Karan is fighting Chronic Ewing Sarcoma (Bone Cancer) at AIIMS hospital, New Delhi. Originally from Uttarakhand', the family is currently residing in a small space at their uncle's house in Sarai Julena, New Delhi. Karan has been bravely undergoing treatment for the past month We pray no child should ever have to face such diseases However, his condition requires life-saving treatments including chemotherapy and surgery , estimated to cost 2 lakhs. This expense is far beyond the family's means, and they are in dire need of financial assistance. Like any parents, they are determined to do whatever it took to save his life We appeal to your generosity and compassion to help child Karan receive the treatment he urgently needs. Your support can make a profound difference in his fight against cancer and provide much-needed relief to his struggling family. Please consider donating or sharing this appeal within your network. Every contribution, no matter how small, brings us one step closer to saving child Karan's life.

A photograph of a man lying in a hospital bed, appearing to be asleep. He is wearing a white hospital gown and has several medical sensors and wires attached to his chest and arm. A nasal cannula is visible in his nostrils. To his left, there are medical monitors and equipment. The background is a plain, light-colored wall.

URGENT

Your Kindness Can Help Karan
